

Unlock your teams' productivity potential and multiply your development power

with Microsoft Power Platform and Sogeti

Low code leader

Power Platform is more than a low-code development solution. It's a full employee productivity platform for building hybrid workplaces, automating activities and delivering new customer experiences.

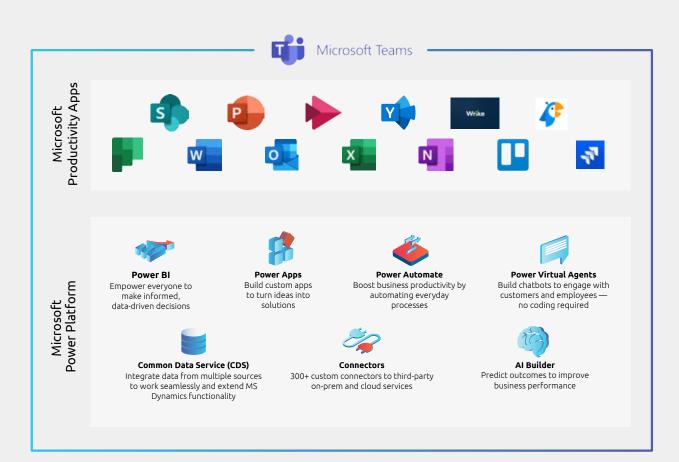

Centralized IT teams struggle to deliver at the speed required by today's fast-moving marketplaces – a problem compounded by the global shortage of professional developers.

With Power Platform, they don't have to.

Employees outside IT are given self-service tools to build, test and deploy intuitive business apps at speed, including using advanced AI and Robotic Process Automation (RPA) technologies. IT teams are freed up to focus on delivering digital transformation projects.

The result is massively increased productivity across every business unit – not just IT.

The business case is clear. But scaling Power Platform requires safeguarding and support, to prevent the system creating hidden risks for you and your customers.

That's where Sogeti can help.

How do Power Apps drive value?

Engagement

Build and test new B2B and B2C portals and app experiences for customers

Efficiency

Build departmental and employee-focused apps

Manage workflows and cases, and compliance and quality, online

Implement Robotic Process Automation for everyday tasks

Modernization

Replace Lotus Notes and 4GL apps

Replace Microsoft Access and Excel-based processes

Support bespoke and core system extensions

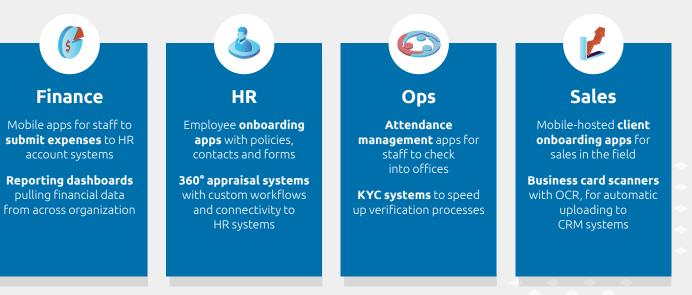

Innovation

Apply AI and IoT to business problems and processes

Prototype new processes and experiences, at speed

Build new products and channels

What do different teams use Power Apps for?

Democratising development raises risk

Empowering employees to develop apps is a great opportunity – but it also introduces new risks. Good governance is essential.

Shadow IT is a fast-growing problem for all enterprises and one multiplied by low code systems.

Power Platform uses the data stored inside your Microsoft, third-party and bespoke systems – including for customer-facing apps.

Organizations must set clear limits and ensure full visibility over their employees' use of this data, given the financial and reputational risks that come with **failed data privacy and security**. Under the General Data Protection Regulation (GDPR), companies face fines of €20m or 4% of their turnover for customer data breaches – whichever is greater.

System complexity is another factor for consideration. Employees of global enterprises may build thousands of apps using Power Platform. Tracking and managing this activity requires effective administrative controls. Forcing employees to navigate poorly-managed Power Platform environments can limit their productivity – not boost it.

* Outsystems: 'The State of Application Development. <u>View Report</u>

Effective governance is also essential to ensure organizations drive maximum ROI from their Power Platform license. Teams that are unaware of the value of the system will be disinclined to build it into their working habits. Building the business case for Power Platform, selling it into business units and training staff to develop their own Power Apps is therefore essential to scale the system successfully.

€20m or 4% of turnover

The maximum fine for business data breaches, under GDPR

25%

of organizations are concerned about security issues caused by low code systems*

28%

of organizations are concerned about scaling their low code systems*

How can Sogeti help?

Sogeti helps to set your system foundations, and scale and safeguard Power Platform across your organization.

This way, we maximize your teams' ability to drive value Power Platform while derisking development activity on the system. Staff are empowered to build their first apps, while your management and IT teams remain in control and aware of system usage at all times.

Sogeti offers expert development and training support, and our unique Power Boost library of reusable Power Platform components as part of a structured, five-step scale-up program. This program includes:

- Interactive group sessions to showcase the value of Power Platform for collaboration, and to foster Power Platform champions. These include App in a Day workshops that offer practical, comprehensive, Power Platform training for IT and management teams over a single day.
- Onboarding and training programs for business units, focused on building Power App prototypes. These include hackathons to

empower teams to solve real-life challenges, with our support.

- Engineer-led App in a Week programs support staff to build and deploy no-code apps across every platform, including AI functionality to automate tasks. Our Low Code Thinkubator supports the development of enterprise-grade Power Apps.
- **System Setup Support** sets the foundations for scaling Power Platform across your organization.

This includes setting your environment strategy, mapping maker & champion workflows, setting data loss-prevention policies, and implementing audit log alerts, admin roles, dashboards, connector controls, component libraries and more.

• App Factory Support helps to estimate the complexity of app automation, manage the migration of legacy systems, choose connectors and components, and deliver templates and accelerators.

Having supported you to implement effective systems governance and scale Power Platform across your business units, we'll remain on hand to provide expert training, governance and development support.

Legacy Automation Platform Development

Consultancy & Training from Sogeti experts

Building Power Platform capacity with support from Sogeti developers & assets

Trusted worldwide

We've helped enterprises across the globe to scale and safeguard Power Platform, and drive employee productvity.

Rabobank's 40,000+ employees had built an unknown, uncontrolled number of apps in Power Platform.

Rabobank sought to embed self-service Power BI, Power Apps and Power Automate tools across teams, to enable new integrations, monitor usage and enable system troubleshooting.

We implemented Rabobank's global Power Platform Center of Excellence to ensure end-to-end compliance, monitoring and management of Power Platform within the bank – which has since become the bank's official preferred internal development platform.

- Employees built 1,000 Power Apps in 12 months
- IT teams built 15 enterprisegrade apps in Power Platform
- 55% of employees now using Power Platform

E (3)

Our client- an established name in financial services in North America, had already implemented a range of low code/no-code systems worldwide in its +3,000 staff and across 27 offices.

With no low code strategy or systems governance, the organization was at risk of creating an unmanageable systems environment, and unable to realize the full value of their Power Platform investment.

Having assessed the client's technology landscape, we built our clients' business case and global strategy for Power Platform.

Then, we executed it, supporting teams to scale and govern their use of the system worldwide, via a mature, outcome-based working model.

- 100% visibility over employees' use of systems
- +3,000 number of staff using Power Platform
- 27 offices supported

Microsoft Power Platform and Sogeti

Having worked with several suppliers to drive adoption and manage Office 365 and Power Platform for their +100,000 employees, our client – a leading consumer packaged goods and life sciences company – sought to simplify their systems governance and planning with a single Power Platform partner.

Sogeti India and Sogeti France offer a dedicated Office 365 team to undertake all the clients' Power Platform activities, acting as the business' preferred partner for developing, supporting and maintaining their Office 365 solution.

Our dedicated team for client includes an onshore development lead, onshore solution architect and several offshore Power Platform developers.

- +26,000 staff with access to Power Platform
- +700 Power Apps created by employees
- 40 enterprise-grade apps developed for client

Our client – a leading consumer goods retailer – was held back by their manual, inconsistent in-store processes and systems for managing product sales. Feedback indicated that customers wanted additional support through the buying process.

Our client sought to upgrade their sales experience for customers while boosting sales planning insight – part of the company's ambition to create a single, lifetime view of each customer.

Capgemini – Sogeti's sister company – worked with client to design, develop and deploy the clients' sales tool – a collection of four Power Apps to track and support clients' journey from first interaction to product installation.

- 30 minutes required to train employees to use new app
- 90% employee adoption rate within five months

Why Sogeti?

Because we're the team that Microsoft sends their clients to, to help them understand, implement and drive value from Power Platform.

As one of the first **Microsoft Power Assist Partners** worldwide, our teams were the first to achieve Microsoft's **Low code Development Advanced Specialist** certification. Our teams in the UK and India are **100% certified in Power Platform**, and we work with Microsoft every day to guide development of the system.

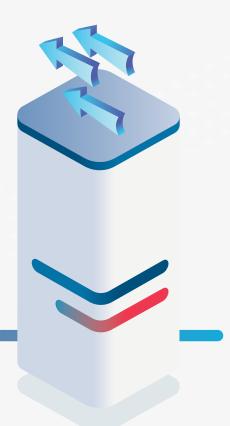

Our Power Platform assets, insight and support put you in complete control of your Power Platform implementation – helping you to embed scale employee development practices at speed, while offering a safety net for security and compliance. Only Sogeti offers a unique set of prebuilt assets to accelerate your Power Platform implementation, in the form of our Power Boost Library.

As part of a global group of companies, you can be sure that we're ready to support any element of your Power Apps journey, at any scale – from ideation to consulting, development, delivery and beyond.

What's included in our Power Boost Library, to help teams to scale up and secure Power Platform?

- **Reusable app components** enable employees to build apps quickly, using consistent design elements and latest Power Platform features leveraging AI and Robotic Process Automation.
- **Quick-start apps** can be used to train employees to build apps using SQL, Microsoft's Common Data Service, Sharepoint and more.
 - **Pre-built reports** track system activity, identify areas for optimization, and map data flows inside and outside system.
- Best practice support automates employee onboarding onto Power Platform, and compliance systems deliver insights into employee system usage.
 - **Custom connectors** to Microsoft, thirdparty and bespoke systems, facilitate reporting, audit-logging and more.

Realize your peoples' potential and multiply your development power.

Let Sogeti scale and safeguard Power Platform across your organisation – so you can drive employee productivity and accelerate your digital transformation, simultaneously.

About Sogeti

Part of the Capgemini Group, Sogeti operates in more than 100 locations globally. Working closely with clients and partners to take full advantage of the opportunities of technology, Sogeti combines agility and speed of implementation to tailor innovative future-focused solutions in Digital Assurance and Testing, Cloud and Cybersecurity, all fueled by AI and automation. With its hands-on 'value in the making' approach and passion for technology, Sogeti helps organizations implement their digital journeys at speed.

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of over 325,000 team members more than 50 countries. With its strong 55-year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fueled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering and platforms. The Group reported in 2021 global revenues of €18 billion. Get The Future You Want | www.capgemini.com
