

IBM Cloud Solutions by Sogeti

Cloud Computing provides a unique opportunity to ensure greater focus on innovation by reducing IT functions that are high in management and financial cost. Through Cloud Computing we develop integration frameworks that bring business, its suppliers and customers into closer collaboration.

Cloud Computing is one of the key approaches helping companies move towards an ideal scenario in which Business Services are provided and available on demand.

Sogeti, with over 40 years experience in providing IT solutions, helps companies in their Journey to the Cloud by making the most of IBM solutions with a complete end-to-end approach:

- Define a Journey to the Cloud adapted to each client
- Define, build, implement and operate smart platforms for the Cloud
- Define, build, implement and operate Collaboration solutions in the Cloud
- Define and Build and run Testing and Development strategies in the Cloud
- Define and Build a complete Security strategy for the Cloud

Sogeti can help you to define your Journey to the Cloud

To define your Journey to the Cloud, Sogeti uses a pragmatic approach driven by Business to:

- Provide Clients with "Cloud Awareness" during a visit to our Cloud Center
- Define a high-level roadmap, analyze cloud maturity, identify risks, identify quick wins during one day workshops addressing the accelerated support IBM technology can provide
- Create Pilots and Proof of Concept.

Sogeti has set up a worldwide Cloud Center based on IBM's CloudBurst Technology.

Our Alliance with IBM

Since its foundation, Sogeti has focused on providing clients with creative technology solutions that are specifically tailored for their business needs like the ones we have created around IBM technology.

IBM and Sogeti have dedicated Alliance teams in place to ensure close collaboration and unmatched service. IBM provides Sogeti with extensive access to its broad range of resources, including technology, education and training for virtually all IBM technology, and IBM Global Financing. This close collaboration and open relationship help optimize the success and lower the risk of engagements.

Sogeti has over 6,000 dedicated and highly trained IBM practice consultants in 15 countries. In recognition of its competencies, Sogeti holds 5 IBM Beacon Awards. Today Sogeti is an IBM Premier Business Partner.

Sogeti can help you build your smart platform for the cloud

An IT department has to manage two constant initiatives simultaneously: establishing a service management strategy (for both internal and external services) while rationalizing, standardizing and automating existing platforms.

IBM CloudBurst is the key building block of this strategy as this platform covers all the necessary components:

- Virtualization
- Provisioning automation
- Service catalogues
- Service management
- Assets managements
- Billing
- Energy management

Around this platform, Sogeti proposes services from consulting to operation in:

- Architecture
- Security
- Virtualization
- Service management
- Storage management

Sogeti can help you to build and operate your Collaboration platform in the cloud

Implementing a global tool inside a company or an ecosystem is never easy; it tends to break a lot of rules especially if the company is organized vertically. Furthermore, opening such tools to collaborate with customers and partners presents even greater challenges.

Sogeti's Collaborative Tools as a Service offers clients the flexibility to make the most of all Cloud capabilities by mixing and integrating different cloud models as well as the Lotus Family's building blocks (Lotus Live and Lotus Connections).

Sogeti can help you to define and operate your Testing Strategy in the Cloud

Sogeti's Innovation Centre has developed a service to create and manage the test infrastructure in a cloud environment. These environments are managed based on Sogeti's structured test methodology, TMap® and using IBM Rational Test Tools.

The solution could be operated in the IBM Public Cloud or in a client's own private cloud test infrastructure based on IBM CloudBurst technology.

Why Sogeti?

Sogeti has the end to end capability to help a wide range of business clients, with expertise running from IT Consulting to Operations. This broad spectrum of knowledge gives a unique edge to Sogeti's Global Cloud Offering by drawing on conceptual know-how and a hands-on understanding of the everyday reality of the Cloud.

We have a service-driven approach to technology, and know that effective IT transformation must be understood and pushed by you. We have proven our knowledge of infrastructure, architecture, security, migration and systems integration time and time again. This know-how and our belief in your collaboration will be the key to getting the most out of the cloud.

By understanding what the cloud can and can't do for your business, you will be able to make informed decisions on where to focus energies for your business. With its broad expertise, Sogeti will be there every step of the way to help you implement a robust, flexible and lasting cloud migration strategy.
