

Energy accelerated.

Finding expert talent to power the energy transition
Right here. Right now.

What happens to the energy transition when you can't find the right people? Gasunie plays a vital role in the Netherlands' energy transition, by advancing hydrogen, green gas, and CO₂ infrastructure while ensuring secure supply. But scaling digital transformation in a competitive ICT market posed a serious talent challenge; especially in the Northern Netherlands, where specialized talent was scarce.

Our dedicated local team worked side-by-side with Gasunie specialists, **575+** ICT professionals, and an AI-powered matching engine to identify talent and deliver fast, precise placements. Partnerships with Microsoft, SAP, and Tricentis ensured certified expertise, while tailored onboarding and continuous learning produced immediate impact.

50% faster onboarding, 100% estimated fulfilment rate and 30%+ women recruited show how efficiency, inclusivity and sustainability can come together to power energy transition.

By aligning talent, technology, and sustainability, we helped Gasunie build a resilient digital backbone for a clean energy future.
